PROFESSIONAL SUMMARY

Entry-level cybersecurity professional pursuing a B.Sc. in Cyber & Digital Science, with demonstrated hands-on skills in penetration testing, vulnerability assessment, and web application security. Completed 4 structured TryHackMe learning paths including Junior Penetration Tester, achieving Level 10 Master rank — placing in approximately the top 5% of platform users. Published security blogs in InfoSec Write-ups (Medium). Proficient in industry-standard tools including Burp Suite, Nmap, Metasploit, and Wireshark. Seeking an entry-level SOC Analyst, Junior Penetration Tester, or Security Analyst role where hands-on skills and self-driven learning can deliver immediate value.

TECHNICAL SKILLS

Offensive Security Tools: Burp Suite, Nmap, Metasploit Framework, SQLMap, Hydra, Gobuster

Defensive / SOC Tools: Wireshark (packet analysis), basic log analysis, intrusion detection concepts

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK (awareness), CVE/CVSS scoring

Security Domains: Web Application Security, Network Reconnaissance, Linux Privilege Escalation, Vulnerability Assessment, Digital Forensics (Introductory), Incident Response Concepts

Operating Systems: Kali Linux, Ubuntu, Windows

Scripting & Development: Python (automation scripts), Bash (security tooling)

Concepts: TCP/IP, DNS, HTTP/HTTPS, OSI model, Active Directory (awareness), CTF methodology

PROJECTS

File & Directory Integrity Checker — Personal Project

2025

- Engineered a Bash-based cryptographic integrity verification tool that hashes files and directories and flags unauthorized modifications — directly applicable to host-based intrusion detection.
- Automated detection of tampered files using SHA-256 hashing, reducing manual verification effort by ~60–70% (estimated).
- Designed tool output to mirror incident response workflows, producing structured alerts consumable by a SOC analyst during a live investigation.
- Demonstrates core skills: Bash scripting, file system forensics, security automation, and understanding of integrity-based detection.

SECURITY RESEARCH & PUBLICATIONS

Technical Author — InfoSec Write-ups (Medium)

2025

- Published "[Before You Touch Nmap: Networking Fundamentals Every Beginner Must Understand](#)" — covering TCP/IP, subnetting, OSI model, DNS, and their relevance to network reconnaissance; received engagement from the InfoSec Write-ups community.
- Published "[Vulnerability Assessment CTF-1 – eJPT \(INE\)](#)" — documented web enumeration, hidden endpoint discovery, and vulnerability identification methodology used in a structured assessment simulation.
- Technical writing demonstrates ability to produce clear, structured security documentation — a core deliverable in both penetration testing (reports) and SOC (incident reports) roles.

HANDS-ON LAB TRAINING — TRYHACKME

Platform Rank: Level 10 – 0xB [Master] — TryHackMe

2024 – 2025

- Completed Junior Penetration Tester path: covered reconnaissance, exploitation, post-exploitation, web hacking, and report writing across 40+ guided rooms.
- Completed Web Fundamentals path: OWASP Top 10 vulnerabilities (SQLi, XSS, IDOR, broken auth), BurpSuite interception, and web enumeration techniques.
- Completed Cyber Security 101 path: SOC fundamentals, threat intelligence, SIEM concepts, log analysis, and incident triage workflows.
- Completed Pre-Security path: networking (TCP/IP, DNS, HTTP), Linux command line, and Windows Active Directory fundamentals.
- Master rank places in approximately the top 5% of TryHackMe's active user base — demonstrating consistent, measurable skill progression.

EXPERIENCE

Cybersecurity Analyst Simulation — Mastercard (via Forage)

2025

- Completed a job simulation modelling the cybersecurity team responsibilities at a global payment technology company.
- Analyzed simulated phishing emails to identify social engineering tactics and produced a security awareness training document targeting non-technical employees.
- Assessed organizational security risks and proposed controls — mirroring real-world security analyst workflows.

CERTIFICATIONS
