

SURAJ APAR

Junior Penetration Tester | eJPT Certified | VAPT & Offensive Security

Pune, Maharashtra, India | +91 9322228397 | aparsuraj@gmail.com

[linkedin.com/in/surajapar](https://www.linkedin.com/in/surajapar) | github.com/surajapar | surajapar.medium.com | tryhackme.com/p/surajapar | hackthebox.com/jiraiya7

PROFESSIONAL SUMMARY

Cybersecurity student with a hands-on foundation in penetration testing fundamentals: OWASP Top 10, vulnerability assessment, and Python/Bash scripting, backed by an eJPT (eLearnSecurity Junior Penetration Tester) certification. Ranked in the top 1% on TryHackMe (Legend, 221 rooms completed) and at Professional rank on Hack The Box (Level 52), with practical lab experience identifying, exploiting, and documenting vulnerabilities across web applications and networked systems. Published 14 lab writeups on Medium documenting host and network penetration testing methodology. Pursuing HTB Certified Penetration Testing Specialist (CPTS), with lab practice in reconnaissance, exploitation, and post-exploitation. Seeking a Junior Penetration Tester / VAPT role, contributing to web, network, and application security assessments.

CERTIFICATIONS

- [eJPT — eLearnSecurity Junior Penetration Tester, INE \(2026\)](#)
- Junior Penetration Tester, Web Fundamentals, Cyber Security 101, Pre-Security learning paths — TryHackMe (2024–2025)
- Introduction to Cybersecurity — Cisco Networking Academy (2024)

TECHNICAL SKILLS

Penetration Testing / VAPT: OWASP Top 10, CWE, vulnerability assessment & exploitation, manual and tool-assisted testing, CVE/CVSS scoring, report writing

Security Testing Tools: Burp Suite, Nmap, Metasploit Framework, SQLMap, Hydra, Gobuster, Netcat, Wireshark

Programming / Scripting: Python, Bash

Networking & Systems: TCP/IP, DNS, HTTP/HTTPS, Kali Linux, Ubuntu, Windows

Domains: Web Application Security, Network Reconnaissance & Scanning, Password Attacks & Hash Cracking, Privilege Escalation, Post-Exploitation, CTF Methodology, Digital Forensics (Introductory)

PROJECTS

[File & Directory Integrity Checker](#) — Personal Project (Python/Bash) 2025

- Built a script-based SHA-256 integrity verification tool detecting unauthorized file and directory modifications — applicable to host-based intrusion detection and secure configuration monitoring
- Structured alert output for clear, actionable reporting of detected changes; reduced manual verification effort

EXPERIENCE & SIMULATIONS

[Cybersecurity Analyst Simulation](#) — Mastercard (via Forage) 2025

- Analyzed phishing emails to identify social-engineering attack techniques and assessed organizational security risks, proposing practical remediation controls
- Produced a security awareness training document for non-technical employees, translating technical risk into actionable guidance

LAB WRITEUPS

[Contributor, InfoSec Write-ups \(Medium\)](#) — 14 published writeups: 11 eJPT (INE) lab walkthroughs covering vulnerability assessment, host and network attacks, Metasploit, exploitation and post-exploitation, plus a 3-part Nmap and networking fundamentals series.

EDUCATION

B.Sc. in Cyber & Digital Science — Dr. D.Y. Patil Arts, Commerce & Science College, Pimpri, Pune
Affiliated to Savitribai Phule Pune University | Average SGPA: 8.56 (Semesters 1–4)

Expected 2027
